Subject: Suggestions for revision of B.Pharm. Syllabus/curriculum as per the feedback of stakeholders

Respected Sir,

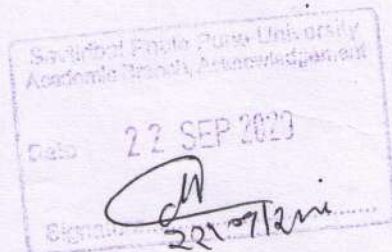

Our college has collected the feedback about the B.Pharm. syllabus/curriculum from the various stakeholders in pharmacy education viz. students, teachers, alumni, employer. I am forwarding here with the suggestions received from stakeholders for your kind consideration.

I request you to kindly consider these suggestions while revising the syllabus.

Thanking you,

(Dr. R. V. Shete)  
Principal  
COLLEGE OF PHARMACY  
Bhore, (Pune)

**RAJGAD DNYANPEETH'S  
COLLEGE OF PHARMACY  
BHORE, Dist.-Pune, Pin-412206**

The following suggestions were received about the B. Pharmacy syllabus/ curriculum:

1. The subject 'Pathophysiology (BP204T)' of Semester II - F.Y.B.Pharm; should be shifted to S.Y.B.Pharm. The students will be able to understand the concepts of Pathophysiology better after completing the study of 'Human anatomy and physiology'.
2. In S. Y. B.Pharm Sem III syllabus, out of four subjects three subjects are from pharmaceutics department. There should be equal distribution of Weightage to other subjects.
3. The subject 'Medicinal Chemistry I (BP402T)' of Semester IV - S.Y.B.Pharm; should be shifted to T.Y.B.Pharm. The students will be able to understand the concepts of Medicinal Chemistry better after completing the study of 'Organic Chemistry'.
4. The concept of Practice School (BP706 PS) at Final Year B. Pharm.(Sem VII) is good. However there could be specific guidelines for the successful implementation of the Practice School.
5. Demonstration practicals should be included in the subject 'Computer Aided Drug Design (BP807 ET)' at Final Year B.Pharm. (Sem VIII).
6. The subject 'Quality Control and Standardization of Herbals (BP806ET)' can be made compulsory in Final Year B. Pharm. rather than keeping it as an optional subject, taking into consideration the rising importance to the herbal medicines.
7. Industrial Training for one month should be made mandatory as a part of the B. Pharm. curriculum and the evaluation of the same should be carried out after the successful completion of the industrial training.
8. The practicals of 'Limit Test of 1) Chloride (2) Sulphate (3) Iron (4) Arsenic' are repeated in Pharmaceutical Analysis I and Pharmaceutical Inorganic Chemistry at Semester I F.Y.B.Pharm. Hence these practicals can be replaced with some other practicals.
